BeelInstant

BeelInstant innovates the approach to monitoring software performance and web applications. The company applied AI to automate manual work, increase operational efficiency by at least 50% and offer top-grade data accuracy for best-ever visibility on systems and user experience. They solve the problem of IT Operation Analytics when scaling fast and migrating to cloud. Any company that runs online applications, software, online services can benefit from their advanced solutions.

BeelInstant, which is based in Dublin, was founded in 2017 by a group of partners who complement each other in the areas of technology and business. The company's solution is backed by a strong engineering team with years of experience at some of the world's leading Tech companies including Amazon, Ericsson, Bloomberg, and Workday. BeelInstant founders have worked in Denmark, Sweden, Ireland, Singapore and Vietnam, bringing extensive international experience to the team.

The vision of BeelInstant is to be the number one software monitoring tool in the market that specialises in a custom metric approach to bring the best-ever actionable insights for both business and technology teams.

BeelInstant has been recognised by a number of prestige organisations including both companies and government bodies. The company has received funding from Enterprise Ireland, and has been supported by Google, KPMG, Bank of Ireland and Web Summit.
